Wolfley as a member of the board of control, includes the transfer of the Republican to friends of Governor Franklin to be run as a democratic administration organ. It will be a difficult task to run it as a stronger administrative organ than it has been for some time.
The "whole cure for rheumatism" is the novelty offered by a hotel in the Australian town of Eden. When a whale is towed into the bay, each patient is permitted to lie two hours in a cavity cut in the body, a huge poultice of decomposing blubber closing about him. A case of rheumatism which would not quit in disgust after such treatment, might as well be given up as incurable.—Ex.

Deafness Cannot be Cured
By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out of the tube restored to its normal condition, hearing will be destroyed forever, unless cause be removed by catarrh, which is not a local inflammation of the mucous lining of the tube.
We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure, sent for free.

The aftermath of the East Prescott fire occurred this morning, when the grand jury returned an indictment against T. J. Lally for arson. Lally had his tool chest at the depot and was apparently intending to go away. He was arrested on a bench warrant and lodged in jail in default of bail. Since the fire it has transpired that Lally held two insurance policies on his house. One was for \$650 and the other for \$700. It is further alleged, also, that the latter one was taken out without any notice to the company which issued the first one. The policy for \$650 had been assigned as security for a mortgage on the premises, but the mortgagee, being an innocent party, the insurance companies paid the amount of his mortgage and refused payment of the balance.

From the tone of the Phenix papers the territorial board of equalization has had under consideration the question of listing railroads, for taxation, which claim exemption under the recent law passed. The Herald says: "Attorney General Wilson has rendered a decision to the territorial Board of Equalization of the territory, that railroads and railroad property exempted by law from taxation. The opinion was to the effect that it was not in the province of the Board to pass on the legality of the law and it was not advisable for them to assess the property. Any taxpayer or creditor of the territory can bring proceedings against the board to compel them to tax any of the exempted roads and thus test the validity of the law. The board consequently will not assess those roads which come under the provisions of the exemption law."
W. A. Rowe, of Yavapai county, was elected chairman of the territorial democratic convention. A special to our contemporary says that the financial policy of the administration was condemned and the delegates to Chicago were instructed to stand uncompromisingly for the free coinage of silver at a ratio of 16 to 1, as to the nominees and the silver plank of the platform independent of all nations. Referring to the article in the Courier in reference to the administration of religion in the public school, I wish to state that the question of religion has not entered into the differences now existing between the public and the trustees at all, but is being introduced at this late day to deceive and mislead the public. Prof. Himes did at the beginning of the school in September open the school with prayer, in accordance with a custom that had been followed in eastern schools where he had taught. This occurred probably three mornings. When informed that it was contrary to school law he promptly and cheerfully complied with the requirements of the law. No order was ever entered on the records kept by the board of trustees in reference to a matter, and the trustees are required by law to keep a record of all their proceedings open to the inspection of the electors of the district.
Prescott has not had a better or more successful school for four years than the term just closing. This has been admitted time and again by the trustee who is now most strongly opposing the re-election of two of the most proficient and worthy teachers, viz, the principal and teacher in the third grammar grade. The truth is not only a pleasant thing. It is only when we clothe it with the rags of imagination, or sweeten it with fiction, that it can please. In this case there has been a strong effort made by one of the trustees, aided and abetted by one solitary friend, to suppress the truth, from the underlying cause of this controversy. The true, real reason, stripped of all the issues that have been attempted to be introduced into it, is the fact that one member of the board of trustees attempted to use his position as a trustee of the public school to further his political aspirations. Being detected and censured for the act, now it is "when the song of hope is hushed forever," that revenge is sought in a diabolical and the writing herbs whose blood dyes her rushing wheels, sees only the goal. Against his expressed judgment, that the continual changing of principal and teachers in the school has resulted in injury to it; against the records of the school which bears abundant evidence of well organized and well taught school for the school year 1895-6; against the wishes of the majority as expressed at a mass meeting of the citizens of Prescott, representative of all classes and creeds, this trustee and his friend are endeavoring to obstinately maintain their position.
Obstinacy is not only the result of a narrow, illiterate judgment, but a barrier to all improvements. Whoever perversely resolves to adhere to plans or opinions, be they right, or be they wrong, because they have adopted them, raises an impassable barrier to progress.
Just as society is often dragged down to low standards by two or three, who propose, in every case, to fight every thing and every idea of which they are not the instigators, so can a public institution be brought to a low standard by officers who allow selfish and spiteful motives to influence their actions in conducting its affairs.
It is the opinion of the people that a majority of the trustees are willing to remedy, as far as it lays in their power, the mistake made by trustees are not asked to do anything unreasonable, and it will not be insisted, that they, in considering the resolution passed at the mass meeting, take any action that would reflect on their integrity as gentlemen, or in future injury to the school.
The majority of the citizens insist that the teachers who have not been retained were the right persons in the right place, and that no change should be made on the grounds that strangers have been heretofore elected to the positions, who were not the right persons for the right place, and the condition of the school at the beginning of the present term will bear out the assertion.
If new teachers are elected, the citizens of Prescott will, as a unit, assist them in maintaining a good school. If the persons who are endeavoring to mislead and influence others by sordid talk, etc., which is entirely foreign to the subject matter, would manifest the same spirit, they would probably be listed to more in reference to school matters, and they might be induced to pay a tax to help support the school, at least a poor tax.
C. H. Hices, County Superintendent.

From the tone of the Phenix papers the territorial board of equalization has had under consideration the question of listing railroads, for taxation, which claim exemption under the recent law passed. The Herald says: "Attorney General Wilson has rendered a decision to the territorial Board of Equalization of the territory, that railroads and railroad property exempted by law from taxation. The opinion was to the effect that it was not in the province of the Board to pass on the legality of the law and it was not advisable for them to assess the property. Any taxpayer or creditor of the territory can bring proceedings against the board to compel them to tax any of the exempted roads and thus test the validity of the law. The board consequently will not assess those roads which come under the provisions of the exemption law."
